

THE VEGAS LOWDOWN

Las Vegas, a Spanish word that means “the meadows,” is more than just a city of gaming. It is a place where lives are created and families are raised everyday. Dubbed “the fastest growing metropolitan city in the U.S.,” there has been a steady growth in the Valley for many years with no signs of slowing down; with focus on education, community outreach programs, transportation, senior care and our youth.

A land that maintains a steady climate and is not ravaged by natural disasters, combined with an appealing tax structure, has been enticing new companies to “set up shop” giving Las Vegas a bursting economy that has attracted more than 750,000 new residents to the Valley since the early nineties.

Las Vegas to many has become a new beginning. Come join us in our “Oasis in the Desert.”

Low taxes in Nevada have made Las Vegas the place to be for industrial and professional growth, as inventory or corporate taxes are levied.

The Assessor's office of Clark County determines the value of each parcel of land whether improved or unimproved. The value is multiplied by 35% to acquire the assessed value of property.

Property taxes are figured by multiplying the assessed value by the tax rate, which for the 2001-2002 tax year was on average \$3.25 per \$100 of assessed value.

To calculate the tax on your home, let's assume you have a home with a taxable value of \$100,000, located in the City of Las Vegas. The tax rate for 2001-02 in the City is \$3.2546 per hundred of assessed value. To determine the assessed value, multiply the taxable value of the home

(\$100,000) by the assessment ratio (35%):

$$\text{\$100,000} \times .35 = \text{\$35,000}$$

assessed value

To calculate the tax, multiply the assessed value by the tax rate (\$3.2546 per hundred dollars of assessed value).

$$\text{\$35,000 (assessed value)} \times .032546 \text{ (tax rate)} = \text{\$1,139 taxes for the 2001-02 fiscal year.}$$

Red Rock

The Red Rock Canyon National Conservation Area is located 20 miles west of Las Vegas. Within the boundaries of the 197,000-acre area is a 13-mile scenic drive, many miles of hiking trails, picnic areas and a visitors center with an exhibit room and bookstore.

Red Rock's most significant geological feature is the Keystone Thrust Fault. About 65 million years ago, two of the Earth's crustal plates collided with such force that part of one plate of grey limestone was thrust up and over the younger red sandstone. The fault extends from the Cottonwood Fault north to the vicinity of La Madre Mountain. The 13-mile scenic drive is a one-way road that also allows bicycle traffic. Sightseeing and hiking trails can be accessed from the park-

ing areas on the side of the road. The scenic drive is open daily from 7 a.m. to 8 p.m. The entry fee is \$5 per car-load, and you can also purchase a \$20 pass that will last you 12 months. Entrance is free for those who walk or ride their bicycles through the gate. Golden Age, Golden Access and Golden Eagle Passes are all valid at Red Rock. Bicycles are permitted only on designated roads and trails. The BLM advises cyclers to wear helmets, bright clothing, carry water, obey traffic laws and pay attention to drivers who may be distracted.

FAVORITE SPOTS

Bonnie Springs - Old Nevada

It is a privately owned enterprise featuring a reproduction of an 1880 western mining town with gunfights, hangings, melodramas, silent movies, saloons, restaurants and displays.

Spring Mountain State Park

Spring Mountain Ranch, a 520-acre area located at the base of Wilson Cliffs, offers historic tours, picnic sites and summer plays. The main house and historic grounds are open on select days. The picnic sites are open from 8 a.m. to dusk.

Wildlife

Numerous wildlife inhabit Red Rock Canyon. BLM officials ask visitors not to feed any of the wild animals and warn that all animals can be dangerous, especially the burros. Feeding burros encourages them to congregate on roadways where many have been killed or injured by vehicles.
